Thank You,

Marty Swauger

Marty Swauger

Training Site Coordinator

We are very excited about this year's Training Season. We have added a few new classes including Lead Awareness, which offers a five year certification. We also have a number of Signaling and Rigging classes to make sure our members are trained for the new OSHA regulations. We have added an advance part of our Trenching & Excavating class which will involve overhead and utility work. We have also included a Welding & Fabrication class that will provide additional training to our members.

We hope to see as many members participating in training classes this year as possible. This is a benefit to all members and will extend your knowledge of the area as well as, gain the necessary skills to have a successful career. I hope all members have a prosperous fall, and look forward to seeing everyone this season.
